Time Machine Connect 2026

Time Machine Connect 2026 (September 30, Aarhus) brings together the Time Machine Organisation (TMO) and EIT Culture & Creativity communities in Aarhus to explore how cultural heritage data, digital technologies and creative expertise can come together to create new opportunities for innovation and collaboration.

From **heritage data**, **3D models** and **digital infrastructures** to creative businesses, **new technologies** and **innovative applications**, the event will showcase what both ecosystems have to offer. And, more importantly, what they can build together.

The programme of the event is already available, and can be consulted here<<<<

Through matchmaking, lightning talks, European project showcases and a hands-on Time Atlas workshop, participants will discover **potential partners**, **explore available resources** and **identify opportunities** for joint projects, pilots and future funding.

Participation is free of charge, but registration is required and will be open until September 22. Register at this link<<<<
