# veraPDF 0.22 released

The latest version of veraPDF is now available to download. Version 0.22 has the following improvements: <b>Application enhancements:</b>
changed default feature generation to document level features;
added a new GUI dialog for managing feature generation options;
added a user-friendly Java OutOfMemoryError with suggestions for reconfiguration;
CLI can now overwrite report files;
added help message when CLI processes STDIN stream; and
synchronized the Web demo validation report with the CLI and GUI report styles.
Conformance checker fixes:
removed the rules for validating file provenance information;

fixed an issue with structure type mapping in Level A validation; and

implemented resource caching for memory optimization.

### **Test corpus:**

converted all 'fail' test cases on file provenance information to 'pass' tests.

## Call for testing

veraPDF is building an open source, industry-supported PDF/A validator. Please support our efforts by downloading and testing the software. If you encounter problems, or wish to suggest improvements, please add them to the project's GitHub issue tracker (<a href="https://github.com/veraPDF/veraPDF-library/issues">https://github.com/veraPDF/veraPDF-library/issues</a>). Your feedback is very important, it helps to improve the software. Keep up to date with the latest developments of veraPDF by subscribing to the veraPDF consortium's newsletter (<a href="http://verapdf.org/subscribe/">http://verapdf.org/subscribe/</a>).

#### **Upcoming events**

- 22 September, veraPDF webinar http://verapdf.org/2016/08/31/preforma-webinar-series-september-2016/]
- 5 October, iPRES workshop <a href="https://ipr16.organizers-congress.org/frontend/index.php?page\_id=2833">https://ipr16.organizers-congress.org/frontend/index.php?page\_id=2833</a>]
- 23 November, PREFORMA Experience workshop, Berlin <a href="http://experienceworkshop.preforma-project.eu/">http://experienceworkshop.preforma-project.eu/</a>.]
