For this specific project Miden is seeking for video art works which make creative use of news and headlines in newspapers, magazines and the internet.

-a special tribute to the **history of Greek video art**, for which Miden invites visual artists from Greece who incorporated video in their artistic practice since the '80s and '90s to send their early art videos (or video documentations of video-installations and performances) from this period. Curators who would like to contribute their research on this theme are also welcomed.

Video Art Miden is an independent organization for the exploration and promotion of video art. Founded by an independent group of Greek artists in 2005, it has been one of the earliest specialized video-art festivals in Greece and builded an international festival identity, presenting an annual video art festival for a decade. Since 2015, Miden continues its work changing its form to a more flexible and broadened event programming, setting as basic aims to stimulate the creation of original video art, to help spread it and develop relevant research.

Through collaborations and exchanges with major international festivals and organizations, it has been recognized as one of the most successful and interesting video art platforms internationally and as an important cultural exchange point for Greek and international video art. It also provides an alternative meeting point for emerging and established artists and a communication hub between artists, organizations, festivals and art spaces around the world.

Miden screening programs have traveled in many cities of Greece and all over the world, and they are hosted by significant festivals, museums and institutions globally.
