

VIEW 2016: 17th International VFX and Computer Graphics conference

Italy's largest computer graphics and digital media conference will swing into action October 24, 2016, in Turin Italy. The renowned confab brings top professionals in animation, visual effects, virtual reality, and digital design to northern Italy for five days of talks, workshops, panel discussions, and interactive sessions presented to an expected audience of 6,000 students and professionals.

Speakers at previous conferences have included Oscar winning directors, sound designers, screenwriters, game designers, musicians, visual effects supervisors, and researchers. This year will see the participation of top creative of the industry like Byron Howard, Conrad Vernon, Mike Mitchell, Roger Guyett, Sharon Calahan, and other important ones.

VIEW 2016 will continue to focus on exploring the increasingly fluid boundary between real and digital worlds. Through lectures, meetings, tributes, exhibits, screenings and demo presentations VIEW will reveal the new digital frontier sweeping from cinema to architecture, from automotive design to advertisement, from medicine to videogames.
