

WEAVE presented at Europeana Generic Services projects meeting

This invite-only event brings together representatives of all running and new Generic Services projects, the funding agency European Health and Digital Executive Agency - HaDEA, and the European Commission.

WEAVE project was presented on day 1 the 11th October with a nice video from the coordinator Alex Stan (IN-2) and a short Q&A with the participants.

Generic Services (GS) projects are funded by the European Commission under the CEF Telecom programme. These projects support cultural heritage institutions in their digital transformation as well as contribute to further development of the Europeana Core Service Platform. Participants of the meeting aim to find synergies, resolve common issues and align with the current and strategic developments around the Europeana Core Service Platform.

Date: 11-12 October 2021

Time: 13:00-17:00 CEST
