AppHub PlugFest in Berlin

Introduction

Open source software is the generic name for both a legal construct to share intellectual property and an approach to cooperative software development. While this approach has demonstrated its ability to produce world-class software, the potential benefits and efficiencies of open source are not, however, always achieved, indeed, far from it. Publishing code is not enough to develop a community of developers and only a minority of open source projects actually make it to stardom. This is certainly why open source remains a challenge for many IT professionals who still prefer to see the downside of open source.

The aim of the AppHub project is to support the market outreach strategies of EU-supported open source by launching AppHub, the European open source marketplace. AppHub is a service platform that will help the market to seamlessly identify, position and implement the software outcomes of these projects.

When? June 13-14, 2016

Check the AppHub Workshop Agenda on next page

Where? AppHub Workshops will take place in

Fraunhofer Fokus, Kaiserin-Augusta-Allee 31, Berlin

Registration

Participation is free, but registration is required**.**

Register here: http://l.ow2.org/apbw

Registration deadline: **May 27, 2016**

AppHub Workshops objectives

The main objective of the **AppHub Workshops** is to assist European open source project to bring their software into the AppHub European Open Source Marketplace. In addition, we like to understand the current state of open source software as developed by EU funded projects, and how we can assist them to improve their quality assurance and governance processes.

Who should participate

- **Project coordinators** who like to understand how to establish proper open source governance as part of the exploitation strategy of their projects. Please attend the **AppHub Workshop #1 on June 13**.

- **Technical people** who like to employ a platform for showcasing their results to make their work known, and are interested to learn about tools for software quality assurance. Please attend the **AppHub Workshop #2 on June 14.**

Participants contribution

- **Please do not prepare slides**! We like participants to engage in an open dialogue about the challenges, problem, and success stories on open source software development.

- **Please prepare a short statement about:**
  - Your project in general, and the software you are developing under an open source license;
  - the group of users that you address with your software;
  - the measures that you employ in order to ensure that you deliver quality software;
  - the way you manage your community of contributors and users;
  - the expectations that you have on our workshop;
  - Remember: No slides!

- **Bring Your Own Software**! If you have executables and an installation procedure ready we can immediately assist to bring your software into the AppHub Open Source Marketplace. We will organize hands-on session on the AppHub platform and OSCAR (Open-source Software Capability Assessment Radar) by OW2.

AppHub PlugFest Agenda

	Workshop#1, June 13, for Project Coordinators Fraunhofer FOKUS - Kaiserin-Augusta-Allee 31 - Berlin, Germany
14:30 – 15:00	**Introduction** by Yury Glikman, the head of the Open Service Engineering group at Fraunhofer FOKUS and President of OW2
15:00 – 16:00	**AppHub Project and OW2 OSCAR** (Open-source Software Capability Assessment Radar) • **AppHub Platform demo**, Alexandre Lefebvre, UShareSoft Pro Services • **AppHub Charter explained**, Cédric Thomas, CEO of OW2 • **OW2 OSCAR: introduction on QA tools**, Stéphane Laurière, CTO of OW2
16:00 – 16:30	Coffee Break

16:30 – 17:15	**Alignment Discussion Session** with AppHub team and each participant
	    Brief statement from EC-projects without slide on problems and expectations
	    Open discussion

17:15 – 17:30	Wrap-up
18:00	**Networking Diner**

	Workshop#2, June 14, for Technical Participants Fraunhofer FOKUS - Kaiserin-Augusta-Allee 31 - Berlin, Germany
9:00 – 9:15	**Introduction** by Yury Glikman, the head of the Open Service Engineering group at Fraunhofer FOKUS and President of OW2
9:15 – 10:00	**AppHub project for the OSS Providers** by Cédric Thomas, CEO of OW2 **OSCAR** (OSS Capability Assessment Radar), by Stéphane Laurière, CTO of OW2 **AppHub Platform Demo** by Alexandre Lefebvre, UShareSoft Professional Services
10:00 – 10:30	**AppHub Platform and OSCAR hands-on session** - each participant, please, Bring Your Own Software
10:30 – 11:00	Coffee break
11:00 – 12:45	**AppHub Platform and OSCAR hands-on session** - each participant, please, Bring Your Own Software
12:45 – 13:00	**Wrap-up**
